PROFESSIONAL SUMMARY

Full-stack developer specializing in Laravel and React, with Node.js and Next.js experience. Deliver features end to end, from React front ends to Laravel APIs, admin dashboards, and cloud deployment. Build secure, real-time, payment-driven systems with role-based access control, WebSockets, and webhook integrations. Ship reliably with Docker, CI/CD, and automated testing. Collaborate remotely with technical and non-technical stakeholders across time zones.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Front End: React 19, Next.js, Redux Toolkit, React Router, Context API, Tailwind CSS, Bootstrap, Blade, Vite

Back End: Laravel 13, Node.js, Express, REST API, JWT Authentication, RBAC, Spatie Permission, WebSockets, Laravel Reverb, MVC Architecture, Eloquent ORM, Payment Webhooks, HMAC, Idempotency, CORS, Composer

Databases: PostgreSQL, MySQL, Query Optimization, Database Migrations and Seeding

Testing: PHPUnit, Pest, Jest

DevOps and Tools: Docker, Nginx, CI/CD, GitHub Actions, Git, Code Review, Railway

INTERNSHIP EXPERIENCE

Full-Stack Developer (Trainee Program) | Mad Fox (Althaalab Almaker) | May 2025 – Mar 2026

- Reduce page load time by ~30% by refactoring Laravel Blade front-end templates for faster rendering.
- Optimize MySQL database queries to improve data retrieval speed and overall application responsiveness.
- Cut recurring bugs by 40% by standardizing Git workflows across the development process.
- Introduce a peer code review process to catch defects before release and raise code quality.
- Develop an internal Laravel and MySQL admin system supporting 50+ CRUD operations with zero data-integrity incidents.

PROJECTS

Marketly | Laravel, React, TypeScript, Docker — Own the full lifecycle of a multi-role SaaS platform, from architecture and database design to Docker deployment. Implement Spatie role-based access control, real-time updates with Laravel Reverb WebSockets, a custom order form builder, and HMAC-verified idempotent payment webhooks that prevent duplicate transactions.

Full-Stack E-Commerce Platform | React, Vite, Express, PostgreSQL, Docker, Railway — Design, build, and deploy an e-commerce platform end to end, with a React front end, Express API, and PostgreSQL database. Secure user access with JWT authentication and ship the app as a Docker container on Railway.

drama.gov.sy | Laravel, Blade, Tailwind CSS — Build and launch an institutional CMS end to end, with a decoupled admin dashboard and role-based access control that lets authorized staff manage content, serving 500+ weekly visitors.

light-promo.com (Freelance) | Laravel, Bootstrap — Independently design, build, and launch a promotional website for a client, from concept to live deployment, supporting 200+ daily visits.

Contest Game | JavaScript, Laravel — Build an interactive contest game end to end, implementing real-time game logic and session management that supports 150 concurrent users.

Masarat Bus System (Graduation Project) | Laravel, MySQL — Design and develop a route management system with full CRUD operations and scheduling for 10+ bus routes.

EDUCATION

BS Information Technology, International University of Science and Technology, Damascus, Syria | Graduated June 2026

CERTIFICATIONS

Master Full-Stack Web Development with Laravel and PHP, Board Infinity / Coursera | July 2026 | Verify
